# Oral cancer in the CNMI

Question: Will adding different sources to chewing betel nut increase a person's chance in obtaining oral cancer?

---

# Can oral cancer be treated without surgery?

- Depending on what stage level your cancer is, surgery is only required for critical levels.
- Other ways of treatment include radiation and chemotherapy.
- Using this question will show people that harsh reality of cancer can do.

# Effective solutions to preventing Oral Cancer

- Quit chewing tobacco
- Brush teeth religiously
- Get a dental check every six months as required
- Don't start

# Ways in retrieving data:

- Contact the head cancer registrar of Saipan
- Search on google scholar
- Look into mostly new cases, but find old cases that support new findings.
- In order for my research to be accurate i would need to do extensive research including using different sites.
